Frequently asked questions

Do you have a question? You are probably not alone. Answers to frequently asked questions are displayed here.

Index

Lab 1

lsh Compilation error due to readline library missing?
Should our shell support n pipes or just one? Should lsh support the following: ls | grep lsh | wc

Lab Submissions

Are you supposed to do the preparation test individually or in groups?

Lab 1

lsh Compilation error due to readline library missing?

Last changed: 6 sep 2017 10:57

Error:
lsh.c:22:31: error: readline/readline.h: No such file or directory
lsh.c:23:30: error: readline/history.h: No such file or directory

Solution:
Your need to install the readline library.
On Debian based Linux flavors like Ubuntu: sudo apt-get install libreadline-dev
On RPM based Linux flavors like Fedora: sudo yum install readline-devel

Should our shell support n pipes or just one?

Should lsh support the following:

ls | grep lsh | wc

Last changed: 20 sep 2017 11:41

Yes, your shell should support more than one pipe.

Lab Submissions

Are you supposed to do the preparation test individually or in groups?

Last changed: 6 sep 2017 10:55

The PingPong system doesn't allow submitting tests as group. So you have to submit the test individually. But you are free to consult your lab partner for the solutions.

Both members of the group should pass the test to have access to the lab assignment page.
